Module 1: Python for AI Engineering

Table of contents

1 Learning Outcomes **1**

2 Module Structure **3**

Chapter 1

Learning Outcomes

By the end of this module, you will be able to:

- Write clean, production-grade Python
- Understand Python data structures deeply
- Build intuition for how Python powers AI systems

Chapter 2

Module Structure

- Python fundamentals
- Control flow and functions
- Data structures
- Pythonic thinking
- Notebook and scripting workflows
